

Important Information/ Informacion Importante

We would like to thank you for choosing us as your permanent cosmetics professionals and entrusting our hands with your permanent make-up needs. However, in order to ensure the most optimal results we recommend highly that you follow our suggestions for an estimated 30-45 days.

If our recommendations are not followed; we cannot stand behind our work and guarantee the best result. Failure to follow these suggestions cause faded blots and/or noticeable color changes on the treated area.

Immediately after and during the first couple of day after the procedure the color will appear darker than the desired tone. After the healing process is complete, the desired color will emerge. If you have any questions or any signs of an allergic reaction please contact us immediately.

Cuando usted decida tatuarse el maquillaje, debe acudir donde expertos en este arte, ya que es un trabajo que lo va a llevar para siempre. Debe seguir con exactitud nuestras recomendaciones de cuidados durante los primeros 30-45 dias.

Si usted no sigue nuestras recomendaciones, no podemos garantizar la calidad de brillo y color. Al no cuidarse, quedaran parches opacos y en algunos casos se borran ciertas partes.

El tatuaje queda significativamente mas oscuro los primeros días hasta que termine totalmente el proceso de descamación. Despues del tiempo indicado observara el color real en que va a quedar. Recuerde no acelerar el proceso de desprendimiento de costras porque quedaran espacios sin pigmentación. Si observa algo abnormal, por favor comunicarse con nosotros inmediatamente.
